

CABLE MANAGEMENT

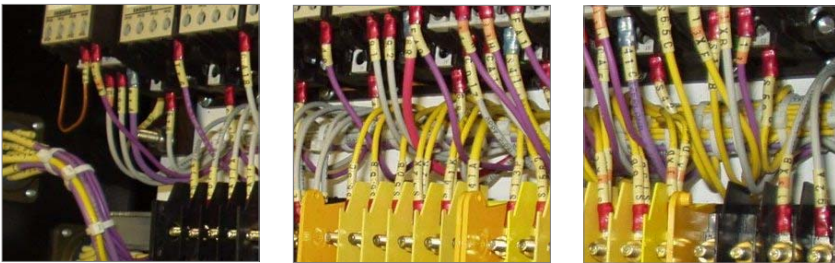

ABOUT US

Our highly skilled Cable Management team offer a complete range of products from single terminated cables to complex pre-wired assemblies. Experience gained from supplying customers across diverse market sectors allow small and large companies to benefit from our cable management expertise.

We offer a completely flexible service utilising both automated and manual production processing, allowing us to react quickly to accommodate small one off batches and high volume scheduled orders.

By working in partnership with all our customers we can also offer specialist cable printing and cable processing for bespoke applications based on our knowledge of customer's business requirements.

With an enviable level of expertise from design through to implementation, Coulstock and Place offer complete cable management solutions.

LEAD PREPARATION

Global market requirements for electrical products require levels of service which comply with both national and international standards. Our customers take comfort from the fact that the products and services outlined below meet these exacting standards.

SINGLE CABLES

Single cables with a cross sectional area between 0.22mm² to 240mm² and multicore cables with a maximum diameter of 25mm can be processed. Cables can be supplied cut, stripped and terminated, or tinned and fitted with cable identification markers and terminal insulators, to your exact specifications.

BATTERY AND EARTH CABLES

Coulstock and Place can produce battery cables and earth straps up to 240mm² in cross sectional area, fitted with terminals from a wide selection of heavy duty crimp lugs and ferrules suited to hostile environments.

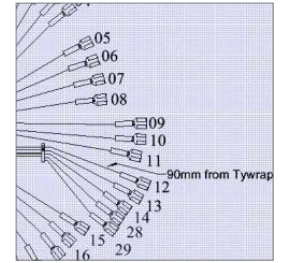

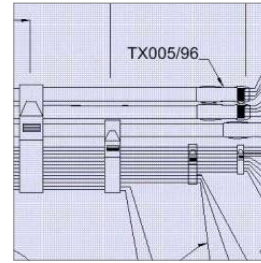

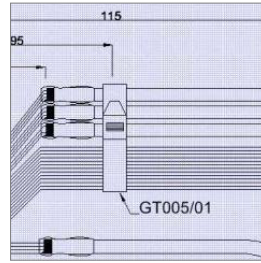

SECTORS

We currently serve a wide range of market sectors including:

- Power generation
- Rail
- Commercial and domestic heating
- Specialist vehicles
- Food preparation
- AC/DC motor and speed control systems

From single cables to battery and earth cables, we have the capability to satisfy all your lead preparation requirements.

HARNESS DESIGN AND BUILD

Cable Management supply a complete cable harness project management service from initial design through to product completion. We work closely with our customers through every stage of the process and all our clients can expect full traceability.

We provide consistent high quality manufacture from small batch to high volume production that enables us to meet the exacting standards of UL accreditation.

At Coulstock and Place we manufacture cable harnesses that provide protection against hazardous conditions including:

- Shock and vibration
- Chemically hostile environments
- Ingress protection

As a result, we ensure the products manufactured are fully compliant with application requirements.

PRE-WIRED ASSEMBLIES

Coulstock and Place is your "one stop shop" for electrical assembly services. We provide a full project management service from simple single terminal cables to complete prewired assemblies.

We review every client project on an individual basis and advise the best solution to suit the customer. We often provide our customers with a more efficient solution which can include everything from specification and material sourcing through to full electrical assembly. We're here to provide as much or as little as you require!

At Coulstock and Place our highly trained staff have many years experience and can provide bespoke solutions to meet specific requirements whenever necessary.

CABLE MANAGEMENT INDUSTRIES SERVED

- IT electrical and electronics
- Automotive and transport
- Domestic appliance
- Marine
- Telecommunications
- Mining, farming and forestry
- Commercial and domestic heating
- Power generation
- Food preparation

MOTORS

NEW MOTORS

At Coulstock and Place we offer a comprehensive stock of electric motors from 0.18kW to 55kW in 2/4/6 pole and single phase motors up to 3kW. We are also able to supply a range of motor control systems, magnetic brakes, inverters and PLCs. Our experience and long established reputation makes us the first choice partner for all your motor requirements.

MOTOR REWINDS

We have an experienced motor rewind team who are fully trained to ensure we always deliver high standards. Our expertise, along with continuous investment in capital equipment has proved invaluable to our customers for many years.

Every aspect of the motor repair is carried out in house. Our extensive range of machinery and equipment provides all aspects of electrical and mechanical repairs and refurbishments including welding, metal spraying and dynamic balancing.

MACHINING SOLUTIONS

Coulstock and Place's specialist engineering division offers an extensive range of bespoke engineering solutions.

REPAIR AND REFURBISHMENT

A comprehensive service is provided to all our customers including repair, refurbishment or remanufacture of components for the water, pet foods, coal, manufacturing, food, chemical and pharmaceutical industries.

DESIGN & MANUFACTURE

When you require a one off bespoke production part Coulstock and Place is here to assist. Our workshop is geared to small batch production and our experienced engineers can design and manufacture to specific customer specifications. We offer a minimum turnaround time and a 24 hour emergency service.

METAL SPRAYING

Metal spraying gives a high quality finish and has a range of advantages including long life protection against corrosion.

REMANUFACTURED COMPRESSORS

As part of J & E Hall, we offer a complete compressor remanufacturing service. Our highly trained technicians have the experience to tackle every stage of the remanufacturing process.

We have the in-house and on-site ability to convert a failed compressor into an efficient "as new" compressor that meets with the original manufacturer's specification. Our team specialise in rebuilding J & E Hall compressors as well as other manufacturers' models. We also provide the award winning range of **remanufactured scroll compressors**.
